## Spring Sash Balances

### Application / Description

Narrow, tension spring balance and friction foot system for aluminum double hung windows. Maximum sash weight of 22Kg.

### Features and Specifications

- Five weight ranges cater for sash weights of up to 22Kg
- Wide range of lengths suit sashes from 350mm to 1100mm high
- Oil tempered galvanised carbon steel tension spring
- High quality Tension foot with stainless steel bow spring and adjustable polymer friction pads.
- Tough ABS black polymer outer casing
- Wide range of lengths and weights available
- Range of adjustable tension feet to suit various sections
- Shock absorbing stops available
- Australian Made

Available in Trade Pack Only.

## Spiral Sash Balances

### Application / Description

Narrow, fully sealed variable pitch spiral and torsion spring balance and foot system for timber or aluminum double hung windows.

### Features and Specifications

- Fully sealed construction
- Oil tempered carbon steel torsion spring
- Zinc plated variable pitch spiral
- Metal zinc diecast fixing plug
- Tough ABS polymer outer casing available in Black
- Corrosion resistant stainless steel sash foot plate
- Comprehensive range of tube lengths and balance weight
- Adjustable spring tension to suit application
- Shock absorbing stops available
- Range of feet available
- Individual balances in Trade packs available
- Tension key required for adjustable foot version
- Australian Made

☒ Aluminium ☒ Timber

### Standard Packs / Finishes

Foot options - available with either:

- **Standard foot**  
Attached to spiral rod, includes accessory kit.
- **Ready to accept adjustable foot**  
Foot sold separately and accessory pack sold separately.

### Finishes

Available in Black tube colour.

### Non Standard Finishes

Other finishes are not available.

### Keying

It is recommended that spiral balances are supported in a 15mm x 15mm rebate.

### Spiral Balance Selection Guide

**Step A - Whitco Product Model**

Whitco Spiral Balance product model is W61

**Step B - Select Balance Number**

If replacing an existing balance, measure the body length and match to Body Length 'L' Dimension.

**Step B1 - Top Sash Balances**

1. Measure the overall height of the top sash (including horns, if used). This is the Closed 'C' Dimension.
2. Refer to appropriate Closed 'C' dimensions on size chart and select the Balance Number matching the Closed 'C' Dimension.
3. If there is not an exact match to Closed 'C' Dimension go to the next smaller Balance Number  
e.g. – For Closed 'C' dimension of 341mm select balance number 110.

**Step B2 - Bottom Sash Balances**

1. Measure the overall window opening height from sill to head. This is the Extended Dimension 'E'
2. Refer to appropriate Extended Dimensions 'E' on size chart and select the Balance Number matching the Extended 'E' Dimension.
3. If there is not an exact match to Extended 'E' Dimension go to the next larger Balance Number size.  
e.g. – For Extended 'E' dimension of 546mm select balance number 110.

**Step C - Select Weight Range**

The next step is to establish the weight of each sash. It is best to weight the sash to ensure an accurate sash weight. If an estimated sash weight is required, this can be calculated using the glass weight per square meter of glass shown below, together with the sash area. For double glazed glass, double the glass thickness used for the calculation. An allowance may also need to be made for the weight of the sash frame material.

3 mm glass thickness weights – 7.5 Kg Per square metre  
4 mm glass thickness weights – 10.0 Kg Per square metre  
5 mm glass thickness weights – 12.5 Kg Per square metre  
6 mm glass thickness weights – 15.0 Kg Per square metre  
Double glazed 6mm+6mm glass thickness weights – 30.0 Kg Per square metre

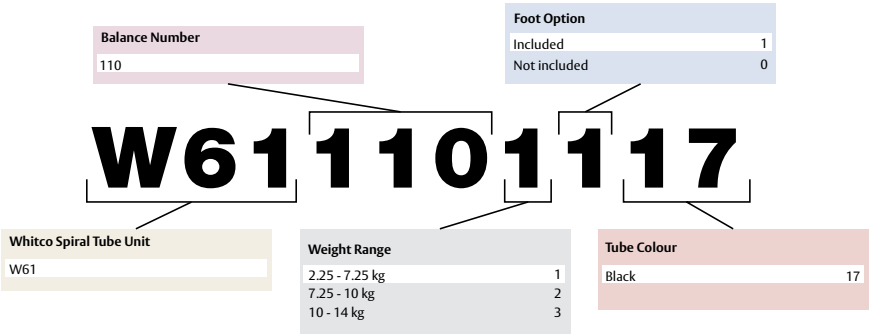

Select the correct weight range to match the sash weight, by using the weight ranges shown below.  
e.g. – For a sash weight of 5.25kg select weight range 1

**Step D - Select Foot Option**

Foot options: Standard foot attached 1 or no foot (to accept adjustable foot) 0  
e.g. – For Standard foot attached select foot option 1.

**Step E - Tube Colour**

Tube finish is Black only – 17
