

# 5400 Series Door furniture

The 5400 Series narrow stile furniture is designed for use in commercial applications, including exterior and interior doors for retail/shop front, educational, governmental, medical and public buildings. The narrow plate is ideal for use on narrow timber or aluminium stiles.

With a range of modern and contemporary lever designs, the 5400 Series will complement any décor. The handing mechanism of this series allows the furniture to be handed on site, by simply rotating the handle in the preferred direction of use prior to installing on the door .

#### **Features**

- Constructed of commercial grade quality components including forged brass handles and extruded brass plates
- Heavy duty compression spring provides a smooth, positive return action of the lever and eliminates droop, extending the life of the product
- Symmetrically designed levers are able to be handed on site within seconds, with a simple 180° rotation of the lever in the preferred direction of use prior to installation.
- Designed for use with Legge 995 narrow stile mortice locks, the 5400 Series can also be supplied to suit Legge 990MF mortice locks
- The 30 year warranty provides specifiers and users with assured quality and performance

## Specification guide

| Function              | Lever                 | Finish                        |
|-----------------------|-----------------------|-------------------------------|
| refer following pages | refer following pages | Antique bronze                |
|                       |                       | Oil rubbed bronze ORB         |
|                       |                       | Polished brass P              |

3. Finish 

Note: For furniture to suit 990MF locks add M to specification guide after function - Applies to functions; External 00, 04, 10, 14, Internal 01, 03, 11, 13

### Handing guide

#### Right Hand

#### Left Hand

## Lever handing

Handing is as simple as a turn of the handle.
The handing mechanism of the Legge 5300 Series eliminates the need to specify the handing of symmetrically designed levers. Handing of the lever is as simple as rotating the handle 180° as illustrated. This mechanism removes the need to have stops and handing screws, thus saving time and money.

**Note:** For asymmetrically designed levers handing can not be reversed, and will require left or right handing to be specified when ordering
